Jon Howell

Smart Spaces & IoT Lead EMEA

Wentzo  
Connect '23

Smart Networking &  
Sustainability

# THE ROLE OF THE EDGE

- The edge is where telemetry data are generated by IoT & OT devices
- The edge is where contextual data are created by intelligent networks
- The edge is where the majority of cyber breaches start
- The edge is where process failures can disrupt facility operations
- The edge is the launch point for uniform visibility and uniform security

# ECONOMIC DRIVERS OF SMART BUILDINGS

- Total economic impact in 2025 is \$70-140B
- Top areas include:
  - Human productivity monitoring \$48-115B
  - Energy monitoring \$12-21B
  - Building security \$3-6B

McKinsey Global Institute, *Unlocking The Potential Of The Internet of Things*,  
June 2015

# Commercial Smart Building IoT Device Projections by Market Vertical

2023 - 2028 (Millions)

2023

2028

- Offices projected to over 1bn devices
- .Number of users inside the building
- Utilization rate of particular spaces
- Time spent/ dwell time in these spaces
- High traffic areas
- Air quality
- Resource utilization

# HPE Aruba Networking's OPEN LOCATE initiative

Things are changing!

Accurate and Automatic AP location discovery, no manual placements anymore

Standardized and freely accessible location information (WGS84)

Location information use without local managed floorplans

Enabling app developers and technology partners

# OPEN LOCATE: Unique Analytics Enhancing

## AUTOMATED INFRASTRUCTURE MAPPING

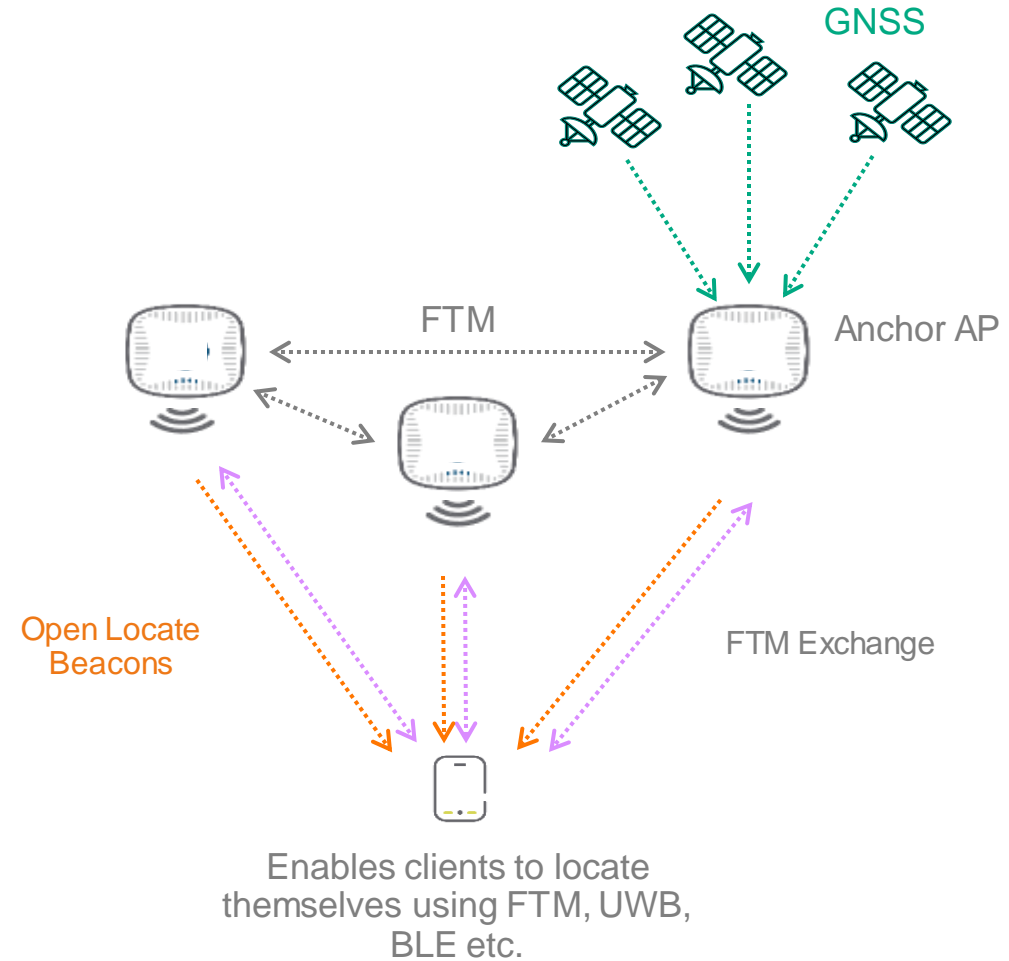

- Know where your Access Points are at all times

## INFRASTRUCTURE LOCATION SHARING

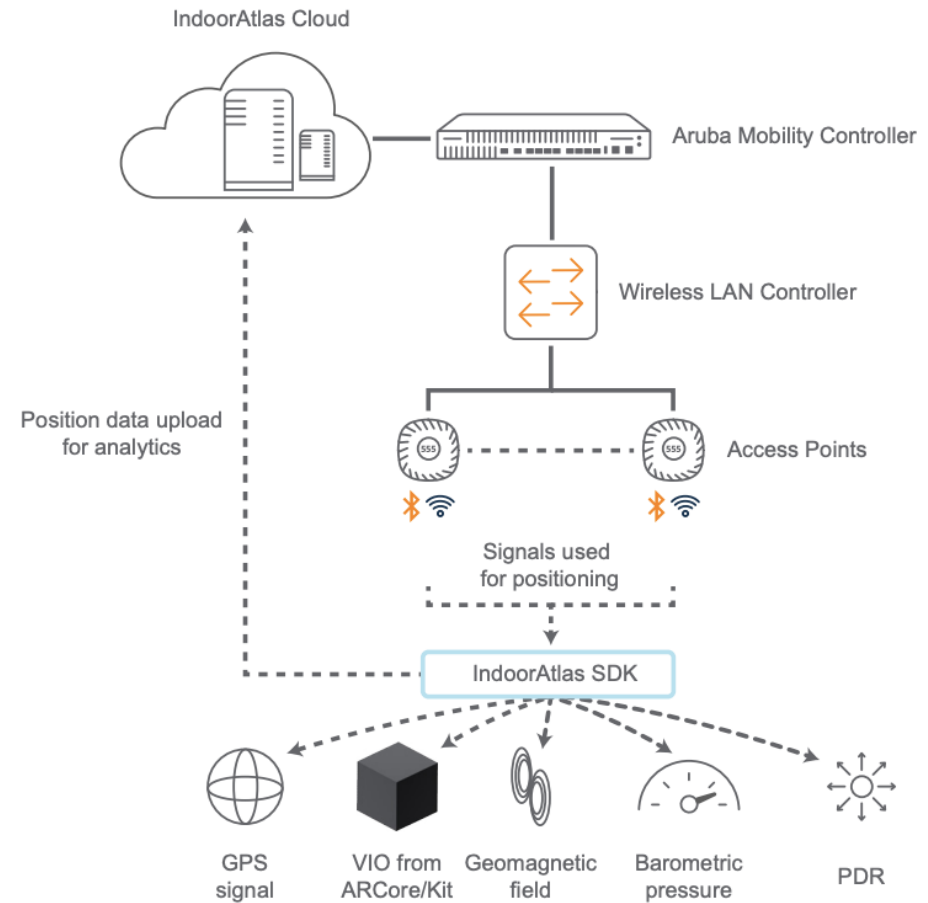

- Open Locate API shares infrastructure location with site maps and apps
- Tracks moves, adds, changes

## PRECISE CLIENT POSITIONING

- Works like GPS with client devices
- Highly-precise location on a lat/long coordinate system

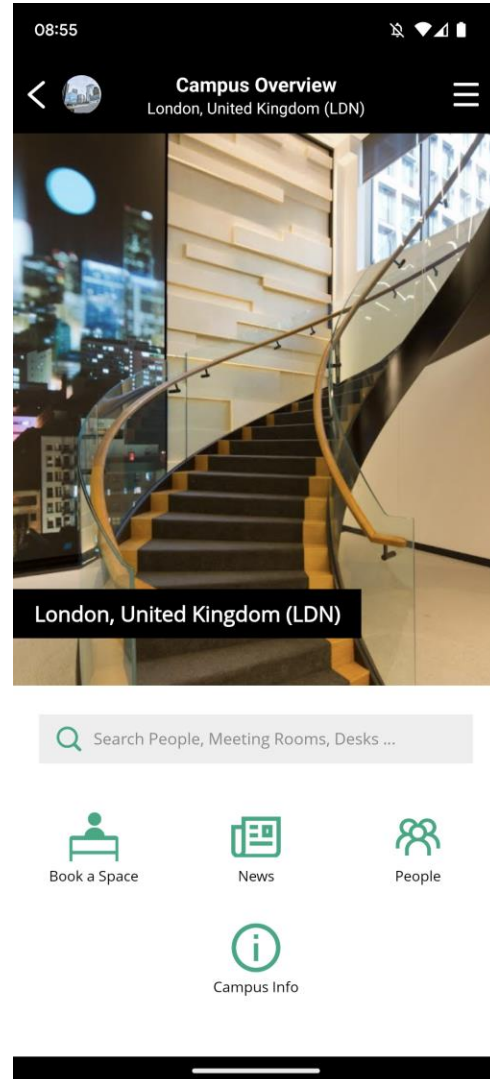

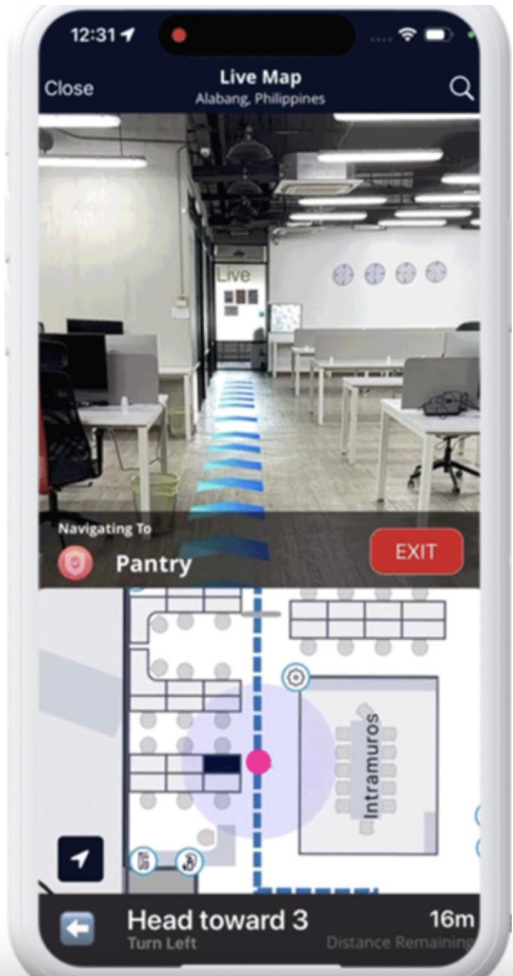

# Indoor Atlas Aruba Integrated AR SDK – 802.11mc / Open Locate/ Service Now

# Employee Experience – Hybrid Working Simplified (Meridian & EnOcean IoT)

- Integrated with EnOcean IoT
- Integrated with MS 365 and Teams
- Integrated with Aruba Meridian
- Award winning global applications
- Many global enterprise customers with HPE.

# Analytics & Occupancy

# Use Cases:

## Supplemented by IoT sensors

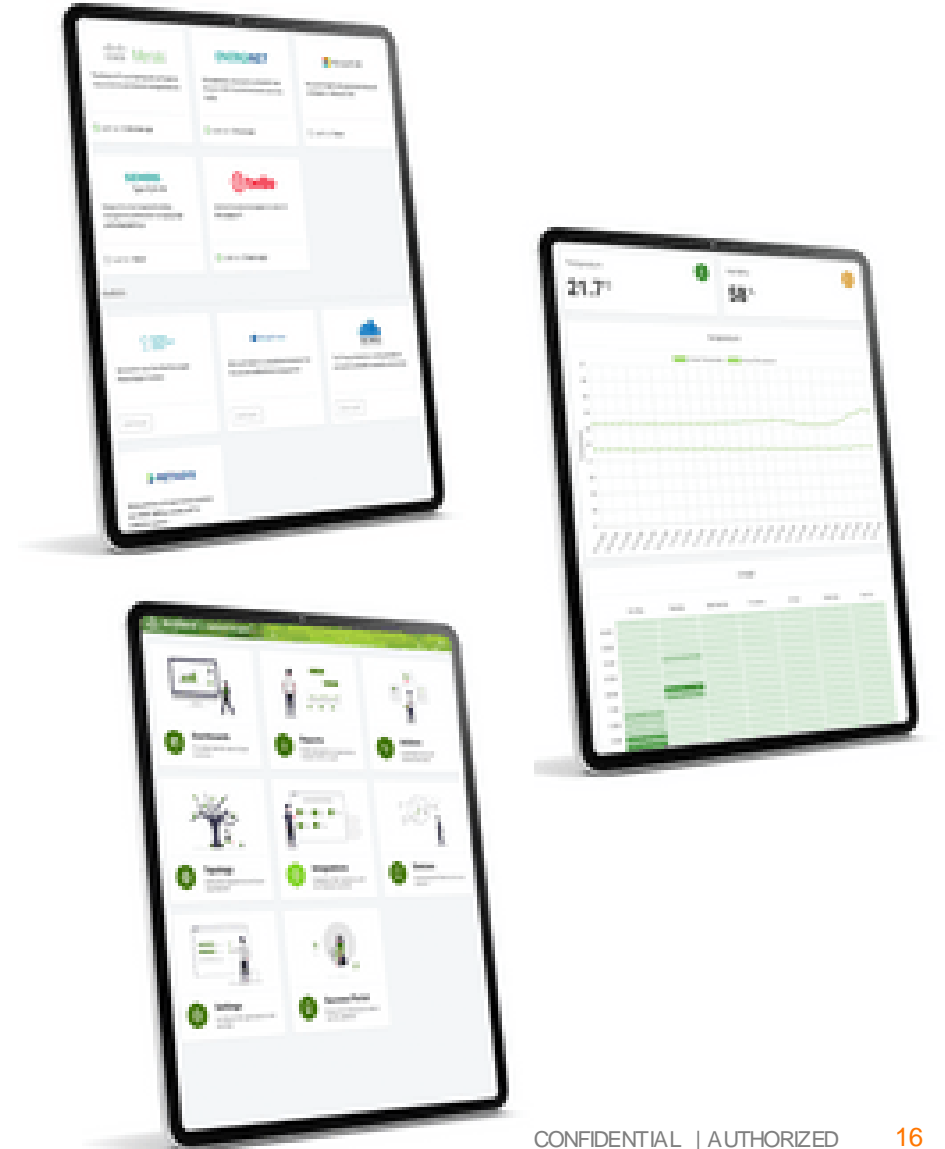

- Optimize facility flow, site upgrades, and visitor experiences based on footfall data and dwell times.
- Real-time analysis of parking dissects the flow of on-site visitor traffic and identify infrastructure improvements.
- Measures footfall across the site to inform staffing, security, and infrastructure decisions.

## Example: Inspari Occupancy Analytics

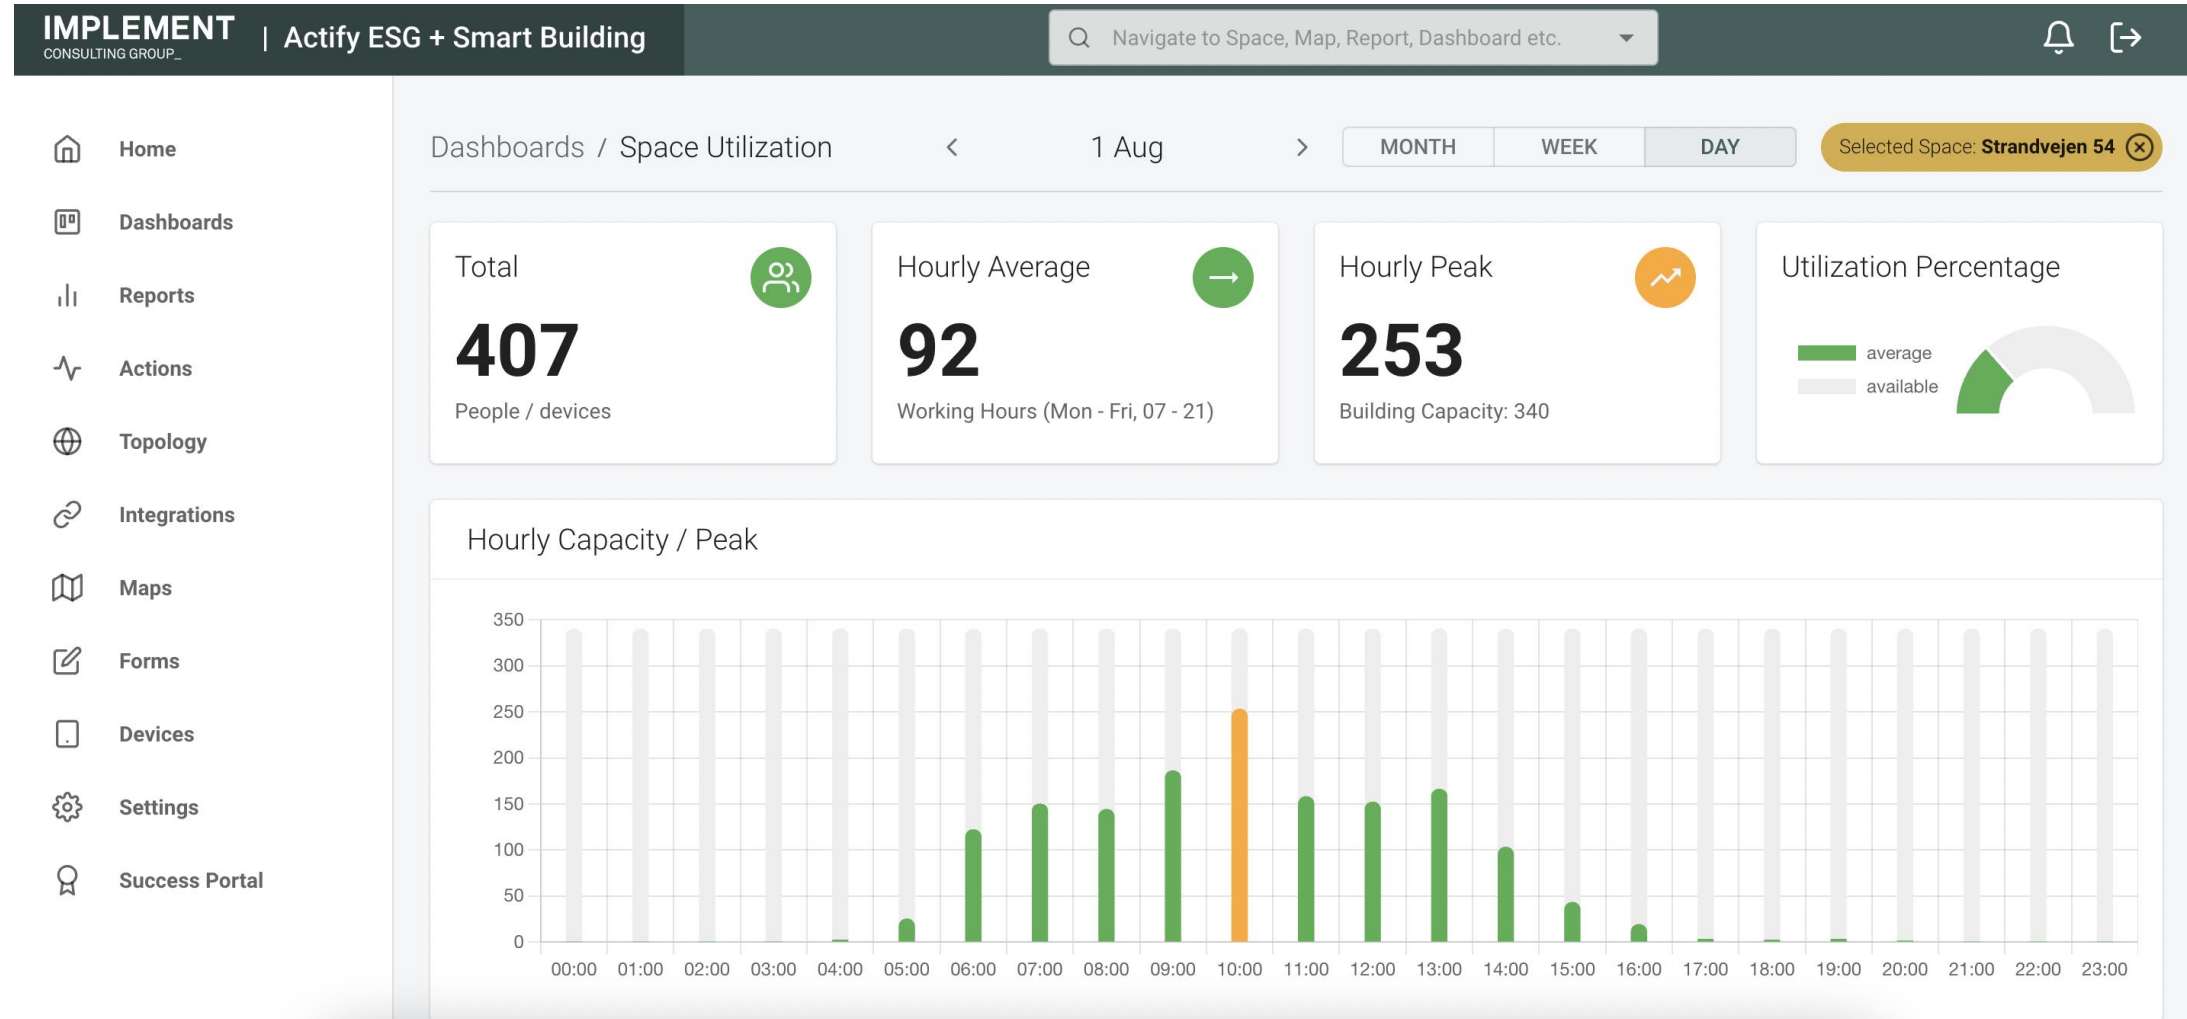

Inspari analyses everything from the individual rooms to floors, buildings and the entire property's portfolio. Several BMS systems, additional IoT sensors and additional data sources are gathered in a homogeneous easy-to-use overview

<https://www.danfoss.com/en/service-and-support/case-stories/dhs/ambient-group-installing-200-ally-radiator-thermostats/>

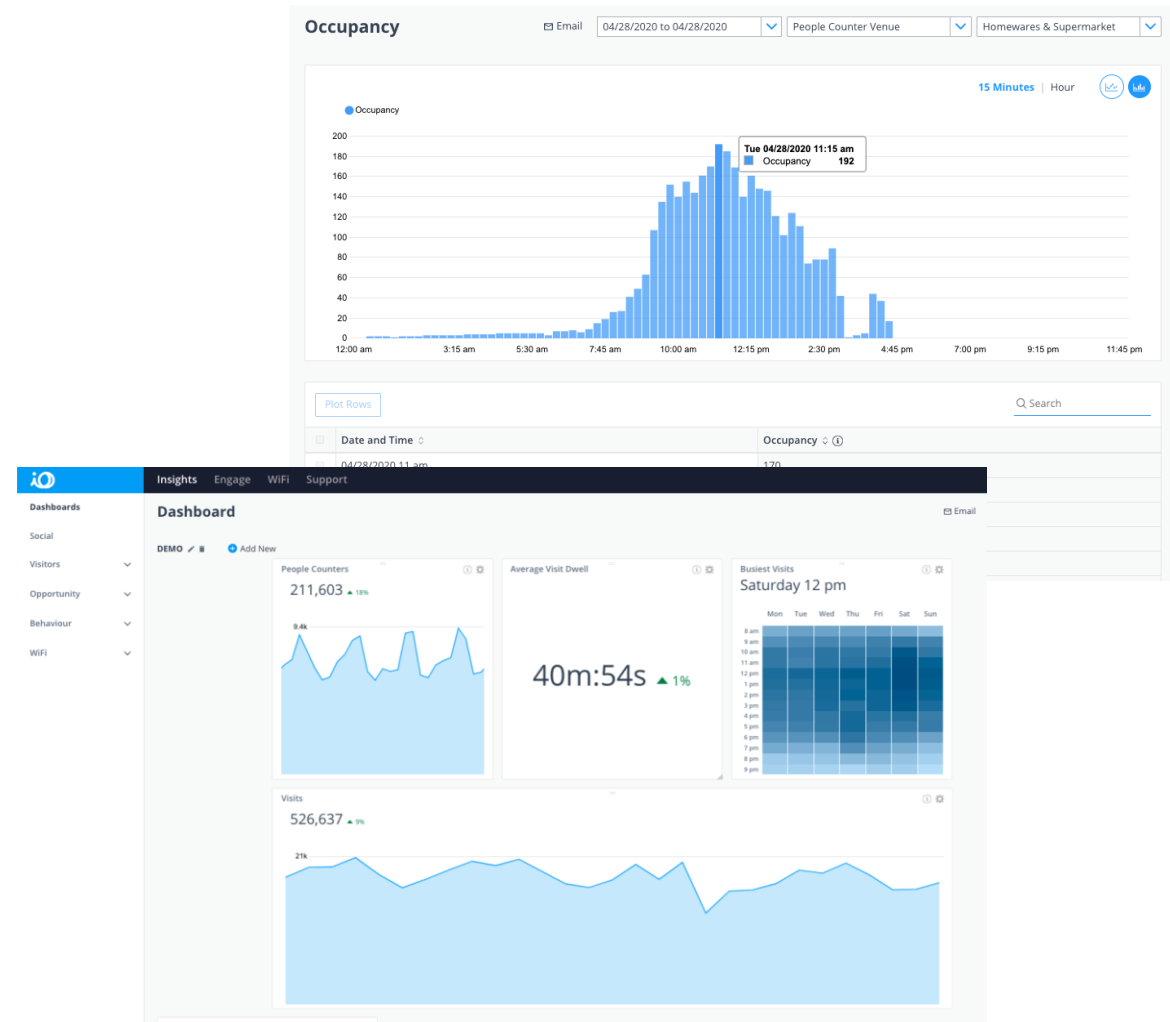

# Inspari – Occupancy Analytics

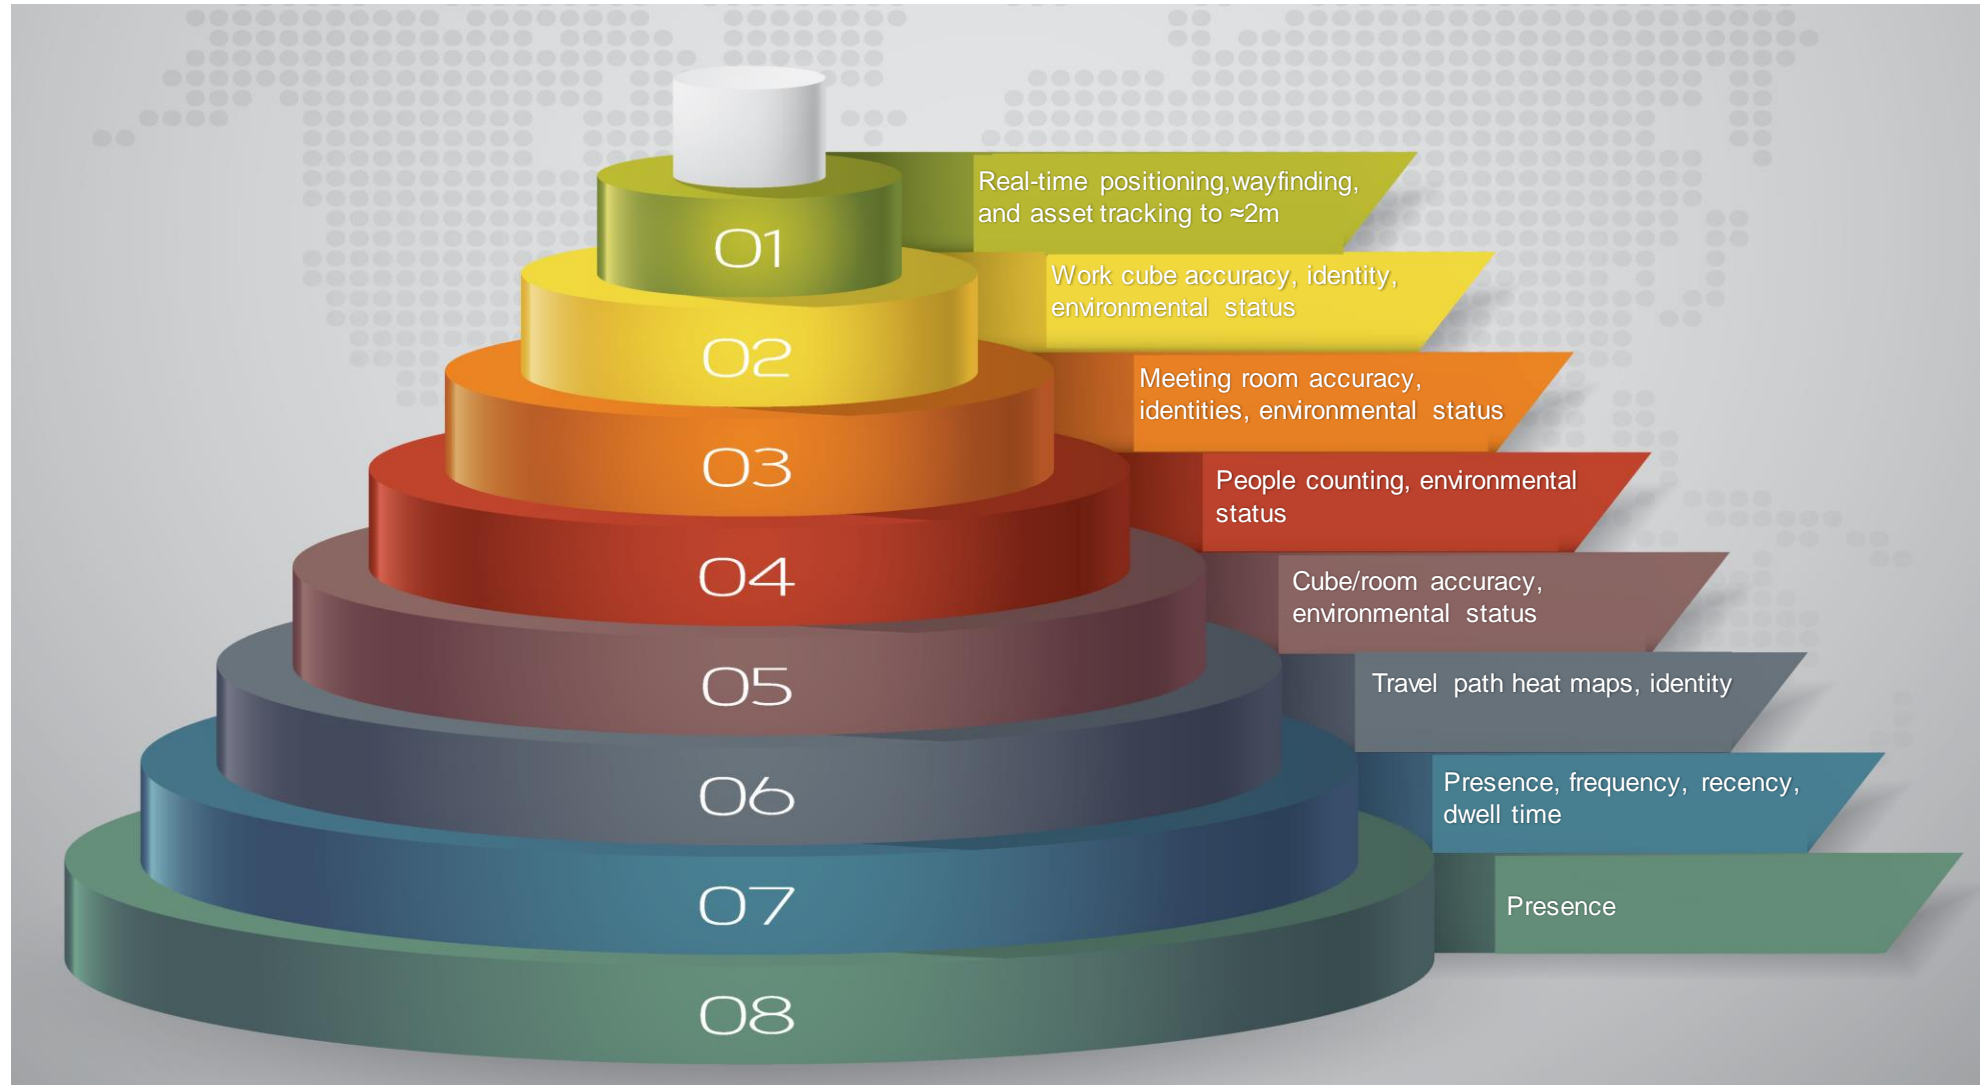

# Example: Skyfii Occupancy Now, Enoclean & Aruba CLE

- Enoclean Alliance Partners.
- EMEA wide RTM
- First customer: Durham University UK
- Mix WLAN analytics with Enoclean desk sensor and multi.
- Extend accuracy with IP Camera integration / LiDAR

# INTELLIGENT LOCATION SERVICES FOR EVERY APPLICATION AND BUDGET

# **Asset Tracking & Localisation**

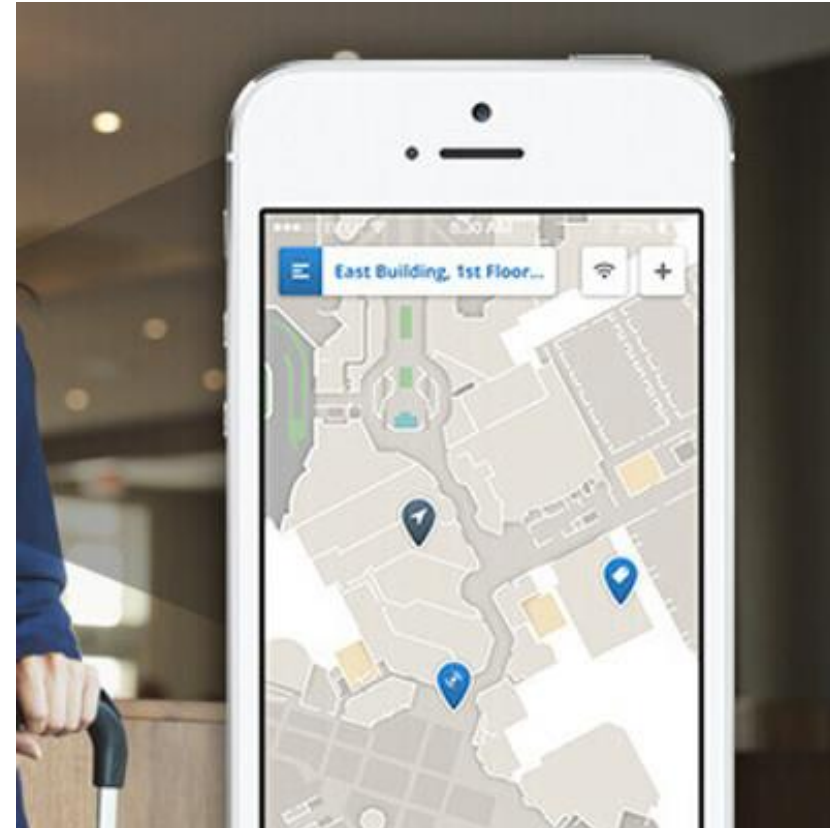

# Enterprise Asset Tracking

- Enterprise asset management (EAM) combines software, Aruba infrastructure and services to help maintain, control and optimize the quality of operational assets throughout their lifecycles.
- Data gathered from asset tags is analyzed using AI techniques. The resulting insights help maintenance teams make better decisions, enhance efficiency, perform preventive maintenance and maximize investments in their physical assets.

**Resolve issues before they happen**

**Maximize asset utilization**

**Monitor assets smarter**

# Asset Tracking - Blyott

Simple Aruba Based Data Visualization

HQ & Warehouse/Logistics tracking solutions.

Retail monitoring

Healthcare Assets

Insights into wheelchair parking occupancy.

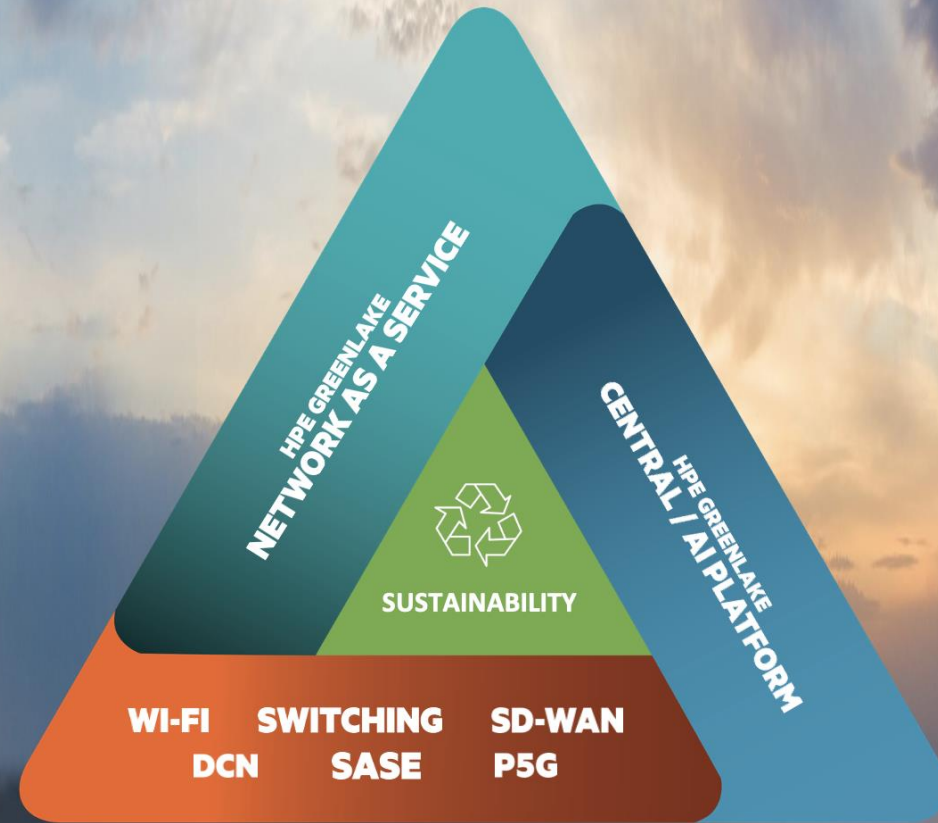

Calculate asset utilisation based on location and movement, e.g., pumps.

## Why Now?

### Climate Emergency:

Nearly 40% of global carbon dioxide emissions come from the real estate sector. Of these emissions, approximately 70% are produced by building operations

### Energy Crisis (EU)

During the first two weeks of the war, Brent prices – the European oil benchmark – increased by more than 25%. By the end of March, European gas prices were around 580% higher than a year earlier

### Government Taxation (EU)

Green Deal (Green Tax) Reduce EU-based GHG emissions by 55% by 2030. It is the first step towards carbon neutrality in 2050. Pushing customers to reduce energy consumption and real estate emissions. DACH Energy 19.

# Aruba Access Point as the connectivity platform

## Unified Infrastructure

## Cost savings of leveraging infrastructure

Integrated solution with access points

**About 89% of connectivity cost (29% of total hardware cost) can be saved**

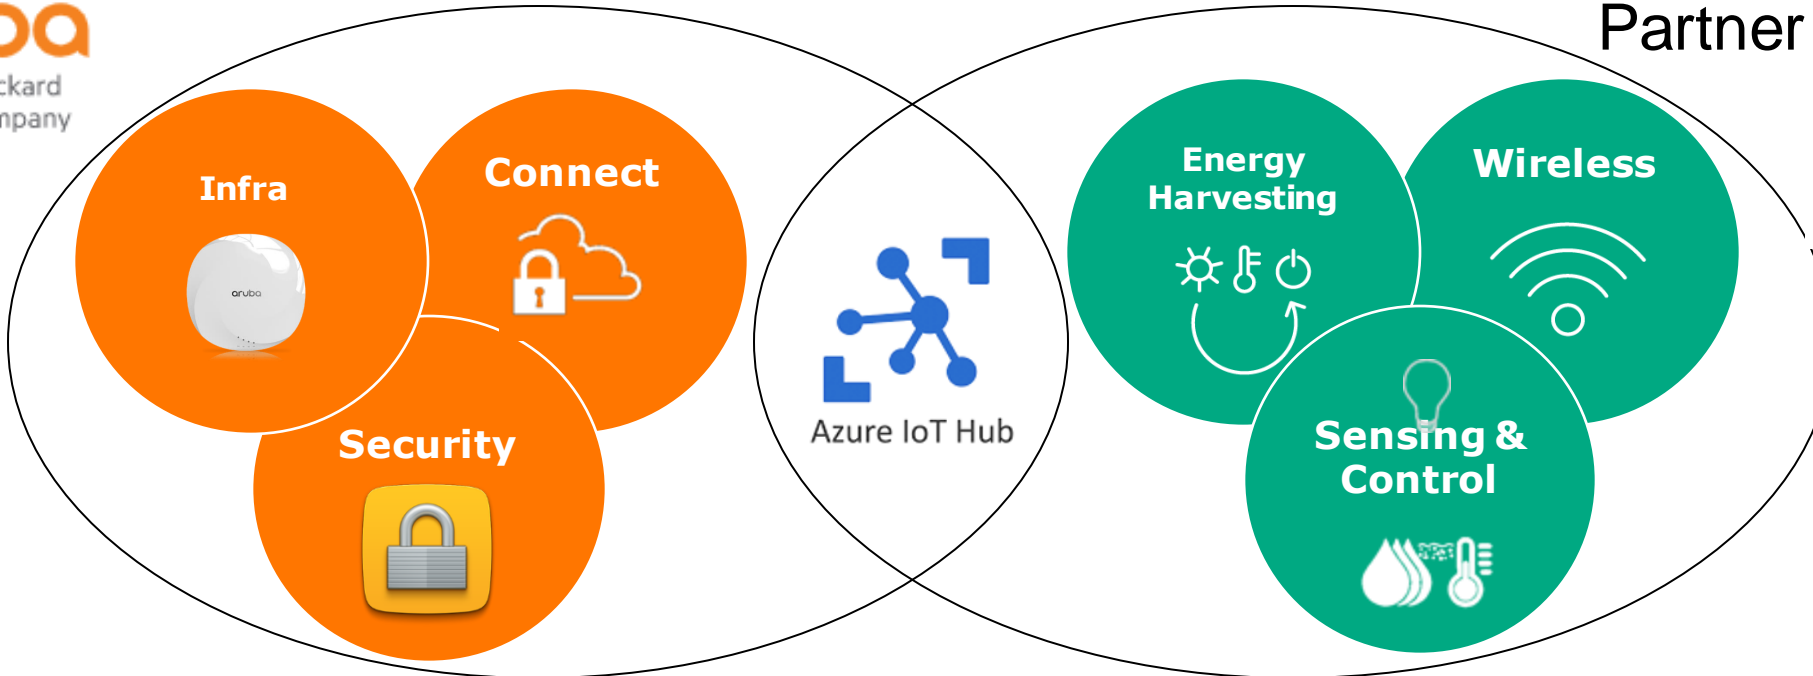

Source: E-Shelter

# Aruba, Microsoft & EnOcean – A strategic partnership

Combining core technologies for easy to deploy IoT projects

Ecosystem  
Partner

- Energy harvesting sensors do the work without batteries
- EnOcean Sensors provide data that cloud services demand
- Aruba access points eliminate the challenge of installing separate gateways
- MSFT Azure Cloud services analyze and react to the data creating a Hyper-Aware building

Microsoft Azure  
IoT Platform

# More Than

# 70%

of the survey recipients indicated that the top benefit they try to achieve from IoT deployment is improve productivity and drive costs reduction.

# USE CASES

# MULTIPLE USE CASES & STAKEHOLDERS

## COO

- Uninterrupted uptime
- Quality and productivity
- Real-time analytics and metrics
- Optimal client service

## CISO

- Data Integrity / protection
- Attack prevention and resilience
- Vulnerability remediation
- Controls and monitoring
- Compliance

## CRE

- Real estate footprint
- Lower opex, optimized capex
- Manage facility risks
- Workplace experience
- Adhere to requirements

## CFO

- Profitability and ROI
- Overall portfolio
- Avoid vendor lock-in
- Minimize and manage financial risks

## CHRO

- Worker satisfaction
- Hiring and retention
- Personal safety / security
- Culture
- Rules and regulations

## CIO

- Technology roadmap
- Operational excellence
- Scalability and architecture
- ROI and cost management

# VAPING DETECTION & AIR QUALITY MONITORING

- USB Intelligent Particle Sensors can be added to any Aruba Wi-Fi 5 and Wi-Fi 6 access point
- Detects particles as small as PM0.1 and counts them in real-time
- A single sensor can be used for vaping detection, CO2 monitoring, and particulate matter mass concentration
- Ideal for enforcing no-vaping rules, and monitoring for other signs of danger

# Management – Aruba IoT Ops

# **IoT Applications/ Visualisation**

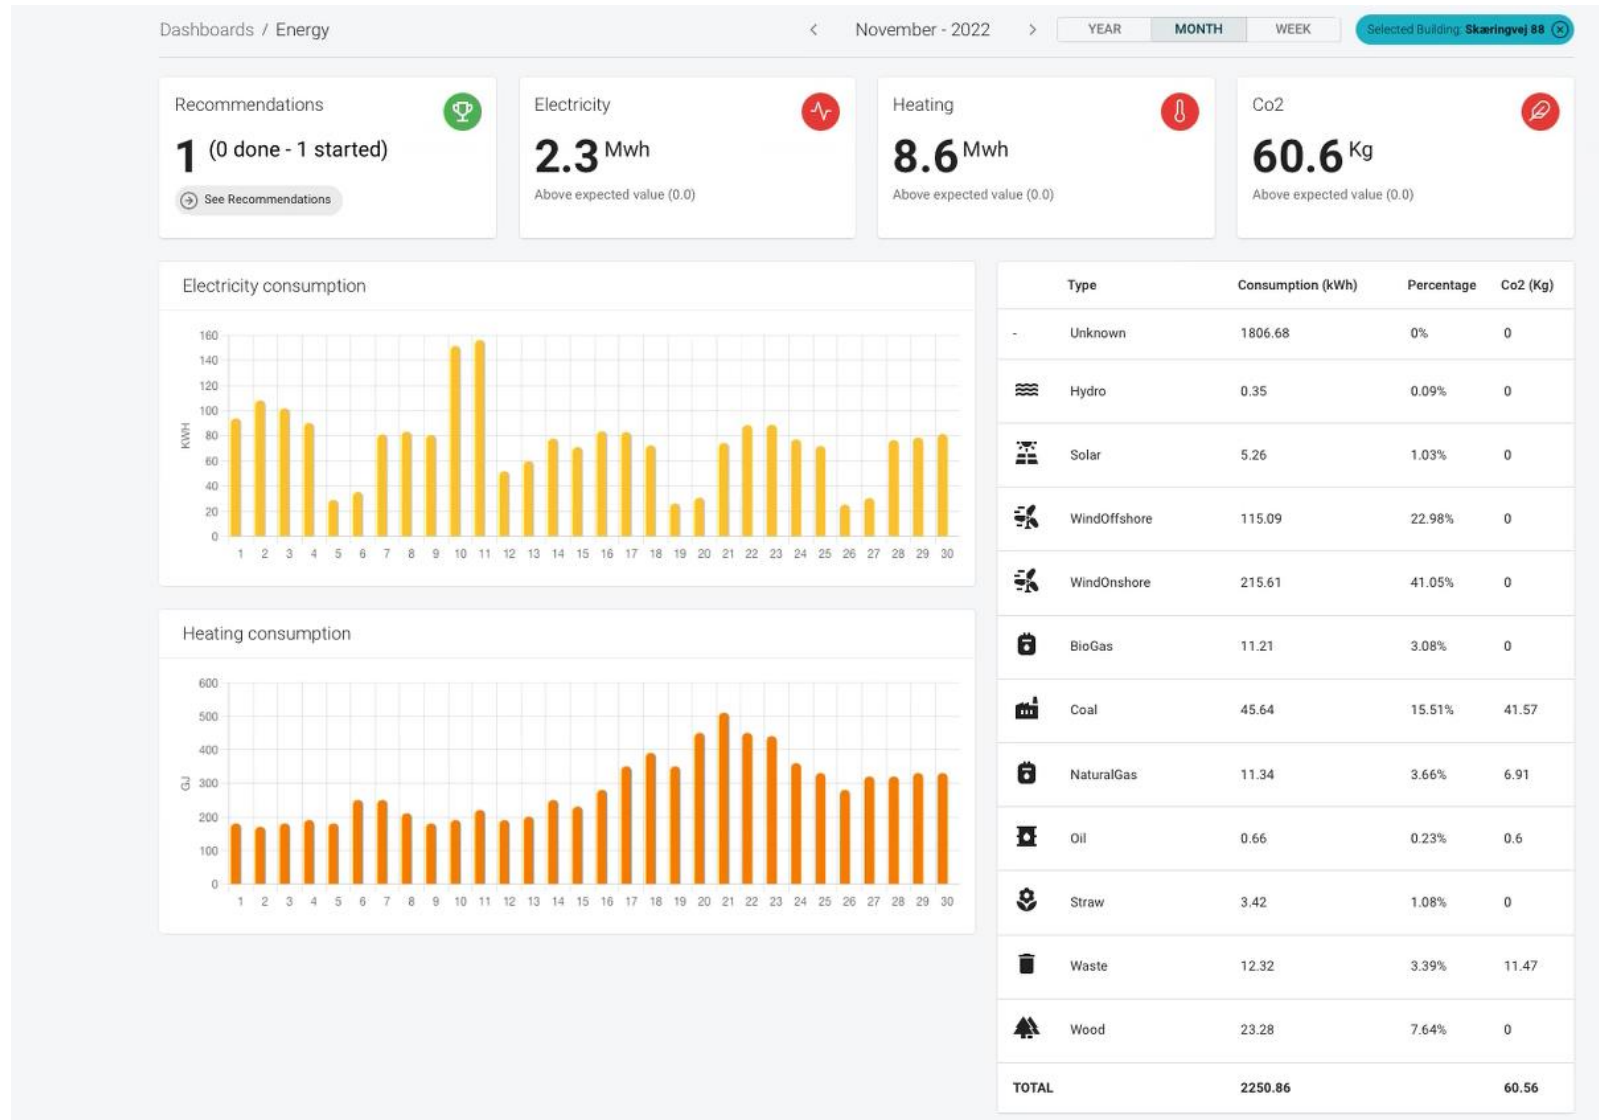

# Sustainability As A Service: Environmental Dashboard

- Leverages Energy Harvesting Sensors with Aruba AP as an IoT gateway.
- Solves multiple challenges, energy, occupancy, climate, air quality.
- Integrates with most know BMS platforms
- Whitelabel Wentzo/ Customer Branded dashboard
- All Azure hosted
- Removes 89% of infrastructure costs.

# Energy Consumption Example: Inspari

- Measure energy consumption per site/location.
- Report on CO2 p/kg or per employee for BACS regulation, Green Tax and Energy 19.

# **Real Business Outcomes**

# Stakeholders

More touchpoints and more budgets for IT.

 Management (IT costs, cleaning, furniture depreciation, consumables, heating, electricity)

 cold rent + additional rental costs ≈50%

**Save the superfluous office space, with positive consequences for the environment and employees**

**Up to 48% less heating energy**

30% space savings through desk sharing + 26% energy savings for the remaining 70% space

Smart heating: 19°C during the day (14h/day) and 16°C at night (10h/day) - 6% heating energy savings with 1° temperature reduction from the current average interior temperature of 22°C

**Up to 33% less electric energy**

Standby-power shutdown during the night and weekends

Source: T-Systems, [www.youtube.com/watch?v=DAXfrSxU5Fc](https://www.youtube.com/watch?v=DAXfrSxU5Fc)

**Up to 50% productivity increase**

Better health & well-being through low CO2 levels

Source: [www.businessinsider.com/office-air-co2-levels-making-workers-tired-2017-11](https://www.businessinsider.com/office-air-co2-levels-making-workers-tired-2017-11)

**1000 employees, 30% shared desks:  
€2.4 million cost savings / year**

# Example Smart Building ROI:

## Typical business case

**Office Space:**  
1000m2

**Population:**  
250 people

**Avg Salary:**  
50000€/y  
253 Working  
days/y

**Seats:**  
300 (desks  
and meeting  
rooms)

**Average cost  
of office space  
in Paris/  
Madrid:**  
600€/m2/y

**Average cost of energy:**  
105€/y/m2 (Jan 2022  
460kW/m2/y)

**Application  
Subscription:**  
3,5€/month/user

### Hybrid work - Real Estate

| Space savings | Savings | Application ROI (Days) |
|---------------|---------|------------------------|
| 10%           | 60000€  | 44                     |
| 20%           | 120000€ | 22                     |
| 30%           | 180000€ | 15                     |

### Management - Productivity

| Payroll      | Improvement               | Productivity gain | Application ROI (Days) |
|--------------|---------------------------|-------------------|------------------------|
|              | 1% = 23 minutes<br>/ week |                   |                        |
| 12 500 000 € |                           | 125 000 €         | 21                     |
| 12 500 000 € | 2%                        | 250 000 €         | 11                     |
| 12 500 000 € | 3%                        | 375 000 €         | 7                      |

### Impact - Energy

| Energy costs savings | Savings | Application ROI (Days) |
|----------------------|---------|------------------------|
| 10%                  | 10500€  | 253                    |
| 20%                  | 21000€  | 127                    |
| 30%                  | 31500€  | 84                     |

| 10% Scenario         | Year 1    | Year 2    | Year 3    | Total     |
|----------------------|-----------|-----------|-----------|-----------|
| Space savings        |           | 60 000 €  | 60 000 €  | 120 000 € |
| Productivity gain    | 125 000 € | 125 000 € | 125 000 € | 375 000 € |
| Energy costs savings | 10 500 €  | 10 500 €  | 10 500 €  | 31 500 €  |
| Total                | 135 500 € | 195 500 € | 195 500 € | 526 500 € |
| ROI (Days)           | 20        | 14        | 14        |           |

**REAL EXAMPLES**

# Employee Experience Example – Credit Agricole - Jooxter

*“Our need was a bit specific: we know that we have a lot of workspaces that can be shared on our territory, while mobility needs are developing (decompartmentalization of headquarters/network, remote work, etc.), recognizes Guillaume Lambour - Organization and Technologies Manager at [Crédit Agricole](#)*

Whitepaper: <https://www.arubanetworks.com/en-gb/resources/case-studies/credit-agricole-normandie/>

## ARUBA WLAN 5 SERIES INTEGRATIONS:

- [Wi-Fi 6 Aruba 515 access points](#)
- [Wi-Fi 6 Aruba 555 access point](#)
- [Mobility Controllers](#)
- [AirWave](#)
- [ClearPass](#)
- [Integration with EnOcean occupancy sensors](#)
- [Integration with Jooxter workplace management platform](#)

## VALUE ADD:

- Streamlines meeting room bookings via a smartphone or laptop
- Offers a long-life solution (potentially 20 years)
- Delivers an integrated Aruba, EnOcean, and Jooxter platform, enabling the reduction in carbon footprint and energy consumption
- Significantly reduces cabling costs and IoT infrastructure (sensors)
- Simplifies IoT and IP Network integration eliminating gateways.

## Use Case examples: Credit Agricole

- Inventory of employment positions and capacity monitoring
- Occupancy measurement across the entire property complex (Smart Building data integration)
- Leave reports imported into Jooxter
- Outlook room schedule synchronized with Jooxter
- The solution is aligned with CSR standards and procedures.
- **This is a first step towards compliance with the BACS (Building Automation & Control Systems) regulation, which requires commercial buildings to control their energy consumption by 2025. In other words, to limit their energy usage**

# **CUSTOMER INNOVATION CENTER GENEVE**

# Come And Visit!

- 1.5 day Wentzo & Aruba Customer Session
- Visiting the sustainable datacenter.
- IoT lab tour
- Technical breakouts with SMEs.
- Great lunch and dinner in Geneva

## GENEVA CUSTOMER INNOVATION CENTER

The Geneva Customer Innovation Center (CIC) provides highly personalized workshops tailored to address your unique business opportunities. Designed with customers in mind, the Geneva CIC features interactive spaces to interact with solutions, become immersed in content and actively participate in business outcome discussions.

Highlights of the Geneva CIC include: unique experience zones featuring the latest in HPE technologies, a dedicated IoT environment showcasing the current and future possibilities, and HPE hardware that drives next-gen capabilities. Visit the state-of-the-art data center, where HPE and partner solutions, prototypes, and benchmarks are hosted.

# Summary

## Wentzo & HPE Aruba – Better Together

- Aruba IoT = max security IoT platform for endless possibilities.
- Aligned Ecosystem integrations i.e Blyott/ Skyfii/ Enocean
- Platinum Aruba Partner
- Managed Services

**NO MORE MANUAL EFFORTS**

**ALWAYS STAY CONNECTED**

# Digital Transformation

## Detailed Heatmaps & Location Analytics

| Visits    | Event Time | Customer Loyalty |
|-----------|------------|------------------|
| 2,181,138 | 75.2m      | 23.4%            |

## Sustainability

## The Retail IoT Revolution

**Automated Real-Time Shelf Monitoring**

# IoT Gateways

- Smart Office**
  - Lighting Control
  - BMS
  - Office Occupancy
  - Air Quality
  - Energy Monitoring
- Assisted Living**
  - Occupancy Monitoring
  - Behaviour Analysis
  - Carer Synchronisation
- Environmental Monitoring**
  - Outdoor Air Quality
  - Vibration Monitoring
  - Noise Monitoring
  - Agriculture Soil Quality
- Smart Manufacturing monitoring**
  - Condition Monitoring
  - Data Collecting
  - Anomaly Detection
  - Predictive Maintenance

# Return On Investment

**ZEBRA**

**UXI AGENT FOR ZEBRA**

DOOR LOCK MANAGEMENT

ENERGY / HEATING, AIR QUALITY SENSORS

TEMPERATURE CONTROL

SMART WRIST BANDS TELEMETRY SENSORS

SMART ROOM MANAGEMENT

FOOD SAFETY SENSORS

DIGITAL SHELF LABEL

SMART LIGHTING AND METERING

# THE USE OF IOT FOR IMPROVED OUTCOMES AND OPERATIONS IS **CRITICAL**

A modern, multi-story office lobby with a high ceiling, large windows, and contemporary furniture. The word "Questions?" is overlaid in the center. The space features a mix of blue, orange, and grey seating, including sofas and armchairs, arranged in a circular pattern. The ceiling is made of horizontal wooden slats, and the walls are a combination of glass and wood. Large windows on the right side provide a view of the outdoors. The overall atmosphere is bright and professional.

Questions?

**HPE** aruba  
networking

**Thank you**
